NORWAY

TEST CONDUCTED BY:

Norwegian National Security Authority

MANUFACTURERS UNDERTAKINGS:

- i. The equipment submitted for Formal TEMPEST Certification Testing is totally representative of production equipment.
- ii. The build standard is frozen and is defined.
- iii. All modifications during and after TEMPEST certification will be subject to Post Test Modification control procedures defined by NSM.
- iv. Configuration Control and Quality Assurance will be undertaken.

Certification is not a guarantee of freedom from security vulnerabilities. This certificate reflects the Certification Body's view at the time of certification. It is the responsibility of users (both prospective and existing) to check whether any security vulnerabilities have been discovered since the date shown on this certificate.
