55.0 inch Multi Vision Display - Series X MVD

Features:

The Series X Multi Vision Display (MVD) range of products provides large 4K resolution display solutions to maritime IBS, Automation and Command Control system integrators. The cutting edge high definition LED display technology used, with its high quality brightness and contrast, enables the presentation of large amounts of data onto one screen instead of multiple displays.

The 4K resolution 55 inch Ultra-High Definition Floor Tilt model is approved for harsh maritime environments, where reliability and long life time are key factors. The 55 inch MVD is a robust, flexible and ergonomic solution, suitable for a wide range of applications including ECDIS, radar, voyage planning, safety systems and tactical command & control platforms.

Features include an optional 40 point Multi-touch touch interface, optical bonding, multi data input, built in On-Screen Display (OSD), full dimming and the option to be supplied calibrated for ECDIS.

The Floor Tilt base houses a Hatteland Technology HT C03/C02 computer (optional).
